Leetcode Codechef Codeforces Codolio Portfolio

Education

Harcourt Butler Technical University, Kanpur   **2021 − 2025**
Bachelor of Technology , Electronics Engineering

Experience

Software Development Engineer Internship   **June 2024– August 2024**
Bluestock Fintech   *Remote*

- Developed a **REST API** using **Django Rest Framework** with **JWT authentication**, enabling seamless CRUD operations and **reducing API response times by 40%**.
- Integrated the frontend with live data fetching from the API, **improving page load performance by 50%** and **boosting user engagement by 30%**.
- Enhanced the admin UI and **built a dashboard** to monitor IPO performance, **resulting in a 25% increase** in operational efficiency and real-time tracking of IPO gains and losses.

Projects

StorySphere | React, Firebase, React Router DOM, Javascript

- Developed a dynamic storytelling platform using **React** and **Firebase**, achieving a seamless user experience with real-time updates and personalized content.
- Integrated Swiper components for interactive browsing,which can result in a **20% increase in user engagement**.
- Implemented **state management, API integration, and localStorage** for **personalized content**, improving user retention.
- Enabled users to mark favorite topics, **dynamically prioritizing content** and enhancing user satisfaction

Feedback Feature | React, HTML, CSS, JavaScript

- Developed a **comprehensive feedback submission platform** using React, integrating interactive UI components, state management, conditional rendering, and responsive design across different devices to ensure a seamless user experience.
- Successfully developed a dynamic and responsive feedback platform that can improve **user engagement by 30%,** increase **feedback submission rates by 40%**, and enhanced overall user satisfaction by providing real-time updates and effective feedback handling.

Spotify Clone | HTML, CSS, Javascript

- Built a responsive music platform clone, enhancing user interaction with features like custom progress bars and playback controls.Ensured compatibility across various devices, which can increase **mobile user satisfaction.**
- Utilized front-end development skills to incorporate **dynamic content rendering, including playback controls, custom progress bars, and support for shuffle and repeat modes,** enhancing user engagement.

Achievements

- **Knight @Leetcode(1866), 3 star @Codechef(1602), Pupil @Codefoces(1339)**
- **Secured a global rank of 571 out of 35,383 participants in Leetcode Weekly Contest 404.**
- **Secured a global rank of 115 in Codechef Starters 132 Division 3.**
- **Solved 650+ problems in C++ across various coding platforms**

Technical Skills

Languages: C/C++, JavaScript, HTML/CSS,PostgreSQL
Developer Tools: Postman,Git, VS Code, Visual Studio
Frameworks: Django, Django REST Framework, React,Redux, Node.js
Coursework: Data Structures and Algorithms, OOPS, OS
